## No-code hackathon for all Digital Health Enthusiasts!

Zürich

Get ready for an exhilarating event: **OpSciHack 2023!** If you're a young medical or life scientist, or a business and tech post-grad with a passion for healthcare, this is your moment to shine!

Picture this: a no-code hackathon that's all about breaking barriers in healthcare. We're talking about collaborating, brainstorming, and crafting digital marvels that address the pressing needs of today. **And who's leading the charge? You are!**

OpSciHack 2023 isn't just any hackathon – it's a platform for innovation, a chance to join hands and practise open science with like-minded minds, and an opportunity to make a real impact. Here's the scoop: the challenges you'll conquer are the unmet needs that our organizers have laid out. And guess what? Your solutions won't just stay confined – **they'll have an OPEN twist!**

Our rallying call: **Embrace the spirit of open science!** Whether it's diving into open data, wielding innovation tools, or championing collaboration, your solutions will stand on the strong pillars of open science. We're talking about 20 enthusiastic participants, all set to team up in groups of four, and embark on a 24-hour journey that's nothing short of electrifying. Their mission? **To think, build, and outline a business model for their ingenious solutions.**

But that's not all – the innovation magic doesn't just happen on its own. Our participants will be armed with a **dynamic design thinking workshop** to fuel their creative engines. And that's not even the best part – they'll be guided by **a squad of seasoned mentors**. These mentors aren't your average folks; they're experts in innovation management, open science, digital health, and medical practice. Imagine the insights, the knowledge, and the inspiration they'll bring to the table!

Now, fast forward to the grand finale. Every team will take center stage, ready to shine as they pitch their brainchild to a panel of those fantastic mentors we just mentioned. This isn't your typical pitch – it's a chance to impress, inspire, and awe the experts with your trailblazing ideas.

The climax? **One winning idea will emerge victorious.** And the cherry on top? The triumphant team will walk away with a prize of 2000 CHF as vouchers for top-notch innovation and entrepreneurship training.

So mark those calendars, rally your team, and get set to unleash your creative genius at OpSciHack 2023. Together, let's shape the future of healthcare!
